Coldwater Conservation Plans

The Coldwater Heritage Partnership administers a grant program to develop Coldwater Conservation Plans for the purpose of conserving and protecting our coldwater streams. Coldwater Conservation Plans are useful in building local awareness and support for the long-term stewardship of coldwater streams and their surrounding watersheds.

The plans are meant to identify potential problems and opportunities for stream conservation and may often also lead to more detailed watershed studies or projects, ultimately improving the health of the coldwater ecosystems.

2003 Grantees

Beaverdam Run

Clinton County

Furnace Run & Segloch Run

Lebanon and Lancaster Counties

Piney Creek

Blair County

Potter Creek

Bedford County

Rasler Run
