C. *Statutory Authority*

D. *Purpose and Background*

The specific purpose and background of this proposed amendment is described in more detail under the summary of proposal.

E. *Summary of Proposal*

Whipple Lake, a 22-acre impoundment owned by the Department of Conservation and Natural Resources, is located within Whipple Dam State Park, Jackson Township, Huntingdon County, approximately 6 miles south of the Borough of State College. This lake was completely dewatered in October 2019 to remove sediment and complete structural improvements to the dam. The earth-fill dam impounds Laurel Run at river-mile 4.6 upstream from its confluence with Standing Stone Creek. Prior to the drawdown in 2019, the lake offered angling opportunities for multiple warm-water and cool-water fish species, as well as adult trout stocked by the Commission. Sediment removal and dam structure improvements are expected to be complete by summer 2020 with refilling initiated soon after.

The Commission plans to initiate stocking the lake beginning in spring 2021, or as soon as refilling conditions allow, with fingerling plants of select fish species to establish a high-quality warm-water and cool-water fishery. Immediately upon refilling of the lake, Commission staff propose to open the lake to fishing under a miscellaneous special regulation that will allow for the harvest of trout under Commonwealth Inland Waters angling regulations, but allow only catch and release fishing for all other fish species. Commission staff believe that this approach will allow for the most rapid development of a balanced warm-water and cool-water fish community, while offering acceptable levels of recreational angling opportunities. Fisheries Management Division staff will monitor the fish populations while they develop, make necessary modifications to the species stocked and recommend adjustments to the regulations governing fish harvest to the Board of Commissioners to continually provide high-quality recreational angling opportunities at Whipple Lake. Once the warm-water fishery is re-established, the lake will be recommended for removal from the miscellaneous special regulation and inclusion in one of the Commission's existing warm-water regulation programs.

The Commission proposes that § 65.24 be amended to read as set forth in Annex A.

F. *Paperwork*

This proposed rulemaking will not increase paperwork and will not create new paperwork requirements.

G. *Fiscal Impact*

This proposed rulemaking will have no adverse fiscal impact on the Commonwealth or its political subdivisions.
