## ARE YOU READY?

This PLAY newsletter reminds young boaters and anglers of examples of the how's and why's of getting ready for the upcoming fishing and boating season.

*Are your rod and reel ready to use? Do you need to replace your fishing line? Do you have all the right tackle for the fish you want to catch?* See how your list compares to the one inside.

Boaters need to have the necessary safety equipment and the right kind and size of life jackets on board. A checklist inside will help you see if you are ready to be safe on the water.

A look inside will help you have a happy and safe fishing and boating season.
