

# MINI FIRST AID KIT

Here's a great way to keep a few bandaids in your tackle box (or book-bag, bike bag, or even in the family car).

## Here's what you need:

- 1 tube of M&M Minis (not the large tube)
- A few bandaids
- A wipe in a packet (like a "Wet Ones")
- 2 quarters (or more)
- 1 small whistle (optional)
- Tweezers (optional, but a good idea)

## Steps:

1. Eat the M&M Minis!
2. Put all other items in the tube, close it and put your

new mini first aid kit in your tackle box.

Use the wipe to clean a wound before you put on the bandaid, and the

tweezers to remove splinters or thorns. And if you need to call home at a payphone, you'll have the quarters. Add more quarters for a can of soda!

These are great little first aid kits! You might want more than one!
