Spring Creek, Centre County
Stream Habitat Improvement and Riparian Buffer Enhancement Project
Spring Creek, Centre County

Pre Project Site Conditions

Pre Project Site Conditions
Pre Project Site Conditions
Design Plans for the Modified Mud Sill Cribbing.
Post Project & Post Riparian Buffer Planting

Note the exposed logs on the face of the Habitat Improvement Structure that are providing the much needed overhead cover to this reach of stream.
Post Project & 1 Year Post Riparian Buffer Planting
Pre Project Site Conditions

Note the vertical eroded bank and lack of riparian vegetation.
Design Plans for the series of Multi-Log Vane Deflectors.
Post Project & Post Riparian Buffer Planting

Note the exposed logs of the Habitat Improvement Structures that are directing the current away from the bank and providing great pocket water habitat in this reach of stream.
Post Project & 1 Year Post Riparian Buffer Planting
