| Walleye Bradford, PA Warren Co. | 17 lb. 9 oz. | Mike Holly Allegheny Reservoir 1980 |

Rules for State-Record Fish

- To be considered a state record, the new fish weight must exceed the current state-record weight by two whole ounces or more. Fish will be weighed to the nearest ounce.
 - Fish must be caught in Pennsylvania waters open to the public without charge or fee. Fish taken from farm and private ponds, regulated-fishing lakes, ponds or streams or in waters restricted to use by club members or their guests do not qualify.
 - Fish must be caught by legal methods during open seasons.
 - Fish must be weighed on a certified scale. Weighing must be witnessed by one person, not including the angler or any companions accompanying the angler at the time of the catch.
 - Measurements must be made with a metal ruler or tape. Measurements must be made by an official measuring station or authorized employee of the Pennsylvania Fish & Boat Commission.
 - Species identification must be verified by a Pennsylvania Fish & Boat Commission biologist, waterways conservation officer (WCO) or other authorized employee of the Pennsylvania Fish & Boat Commission.
 - A clear side-view photograph of the fish is required. Fins should be spread open to the extent possible. The photograph should be in color. Get close enough to allow the fish to fill the entire frame.
 - Application must be received within 60 days of the catch.
 - Resident and non-resident anglers can qualify.
 - Completed application must be sworn to and properly notarized.
 - The Pennsylvania Fish & Boat Commission reserves the right to investigate the identification, methods used in catching and the accuracy of measuring and weighing. It also reserves the right to reject any application.
 - Each entry becomes the property of the Pennsylvania Fish & Boat Commission including all publication rights. Photographs will not be returned.
 - Parental signature is required for applicants under 18 years of age.
- Visit the Commission's web site, www.fishandboat.com, to download applications for state-record fish.
