

PFBC's Social Media

With the increase of social media throughout our everyday lives, anglers can communicate with one another easily. Facebook is a great way to stay connected with PFBC. It's also a great way to share photos of the fish you catch and see what others are catching. PFBC provides social

media through Facebook, Twitter, YouTube, Instagram and Flickr. Please "like" us on Facebook at PaFishandBoat and post photos of your fishing fun!

Digital cameras and cell phones have made it possible to use C.P.R. while fishing. Wait a minute, an angler brings a fish back to life? No, when fishing, C.P.R. means something much different. First, the angler

catches the fish. Then, with the timer feature on your phone or camera, the angler takes a photo of the fish, so they can capture the moment. Finally, the angler releases the fish unharmed for someone else to catch. At that time, photos can be posted to Facebook to show your friends what you caught.
