

# There's an App for That!

The PFBC developed a mobile app (application) for smartphone users. It can be downloaded through Apple or Android systems. It's a great way to find stocking schedules for the upcoming trout season.

In the fall, Lake Erie steelhead anglers can use the app to find public fishing areas on Lake Erie tributaries. If you want to fish new waters, it has a feature to find waterways near you. It also has a trophy room where you can store all your trophy fish and record their measurements.

Even though technology may seem overwhelming at first, PFBC hopes that you see the benefits of becoming a high-tech angler.

We hope to see you on the streams connecting with people from all over the world.

Go to [www.pfbc.pa.gov/mobile.htm](http://www.pfbc.pa.gov/mobile.htm) to download the free mobile app.
