THE FISHES OF PENNSYLVANIA

by Jay R. Stauffer Jr, Robert W. Criswell and Douglas P. Fischer

Jay R. Stauffer Jr. (Pennsylvania State University), Robert W. Criswell (Pennsylvania Biological Survey) and Douglas P. Fischer (Pennsylvania Fish & Boat Commission (PFBC)) present comprehensive information for an audience of anglers, naturalists and researchers. Each freshwater and migratory species regularly occurring in Pennsylvania receives a full species account, in addition to family and genera accounts. The species accounts contain

descriptions of physical characteristics (including identification keys), color photographs of each species, colored distribution maps organized into three time periods, biological and ecological information, a conservation status summary and remarks. Chapters provide a description of the history of ichthyology in Pennsylvania, the waterways of the Commonwealth, the origin of the fish fauna, introduced fishes, conservation efforts, the study of fishes, basic anatomy, characters and methodology for identification, collection techniques, photography, videography, and sport fishing opportunities (the latter guest-authored by PFBC Executive Director John A. Arway). Rob Criswell's vibrant color photography is used throughout the book and illustrations are by Nevin Welte (PFBC and Western Pennsylvania Conservancy).

The History of the Pennsylvania Fish & Boat Commission

As the Pennsylvania Fish & Boat Commission celebrates its 150th anniversary, this book charts the agency's path and accomplishments. It also serves as a comprehensive and popular history about Pennsylvania fishing and boating as we know it today. It's filled with hundreds of images and photos from the Commission's archives. In addition to purchasing your own copy, it makes a great gift for that special angler or boater.
